# Shared Electric Vehicle Software

# For different sharing models specific to your brand personalized solutions

Choose your vehicle type, decide on your operating model; let's tailor our solution together according to your needs and customize it for your brand. Tripy is with you every step of the way.

## White Label App

The white label application can be customized according to the brand and market needs, or a unique app can be developed with a comprehensive API and Webhooks infrastructure.

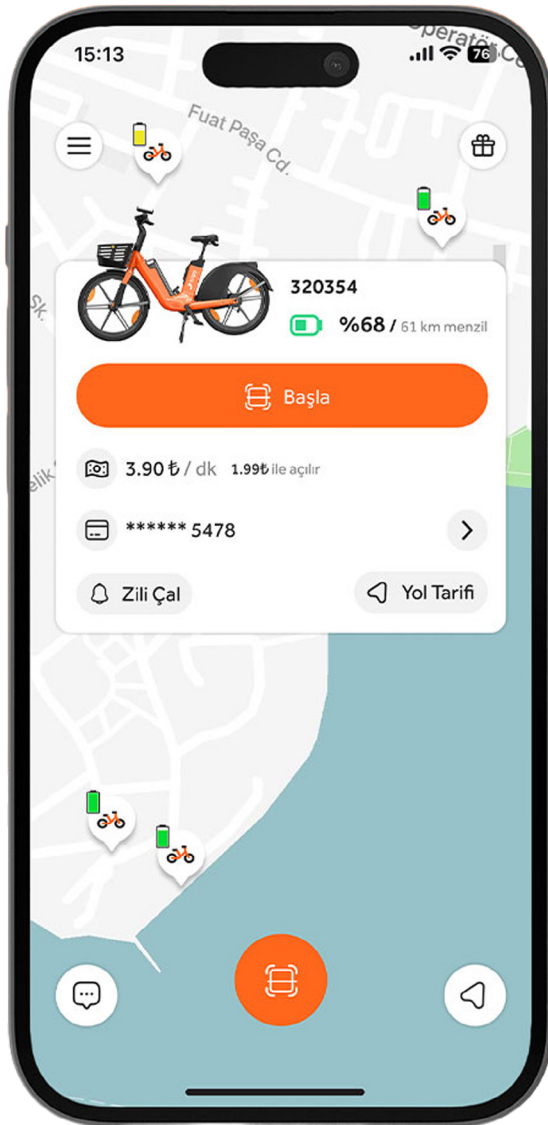

## API Software Platform

Manage your operation in the most efficient way to gain a competitive advantage, using our industry-leading good core features.

## B2C

To increase the adoption of shared mobility in your region, stand out as a regional brand, reaching consumers and local communities directly.

## Tripy End User Application

Customized native mobile apps (iOS and Android) with a sleek interface and excellent user experience. Meet your users' needs in the best way possible with different types and combinations of tools, broad language support and geographic reach.

Your app is regularly maintained and updated so you can focus on developing your business.

## Some of the Key Features

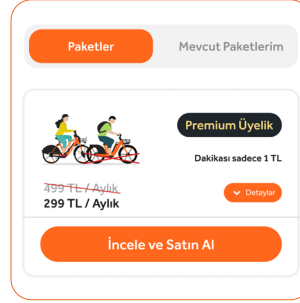

- Customization of various parameters
- Beautiful user interface design and easy to use
- Multi-language support
- Subscriptions
- End-of-drive calorie, carbon emission calculations
- Dynamic pricing
- Invoicing
- Direct connection to customer support
- End-of-trip trip evaluation
- ID/Passport or driver's license verification
- Vehicle and driver location tracking
- Virtual wallet
- Various types of payments

# Tripy End User Application

## White Label App

Add your logo, branding, colors, edit text, set preferences and translations to make your app look the way you want.

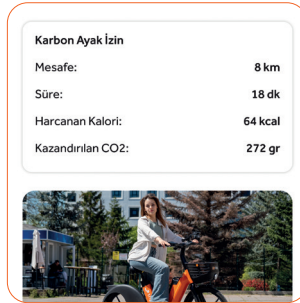

## Subscriptions and Packages

Offer users one-time and recurring subscription options to increase customer loyalty. For example, an annual premium membership, a weekly 90-minute ride or a weekend package with 2 days of unlimited rides.

## Virtual Wallet

Make your customers' rides easier! Pay quickly with a virtual wallet, eliminate the hassle of loading balances and paying each time, and offer advantageous journeys with discounts and bonuses.

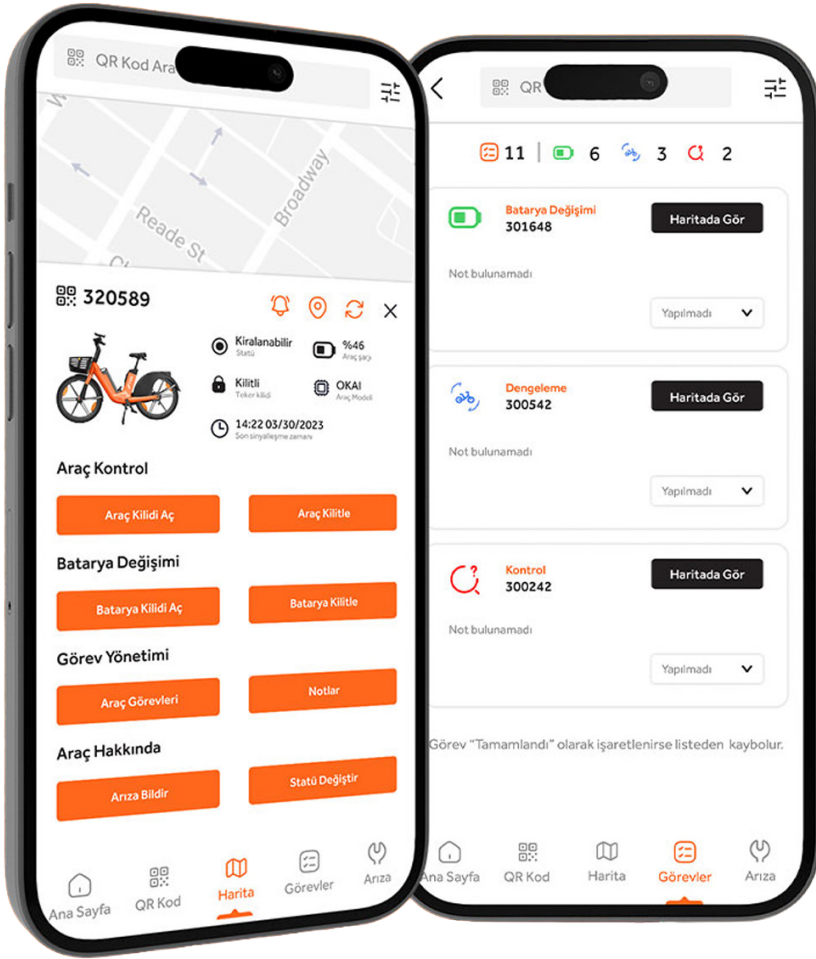

## Contribution to the Environment

Show your users the calories burned and carbon emissions saved at the end of their ride. They can instantly see their contribution to their health and the environment, and enjoy protecting themselves and the planet.

## ID/Passport Driver's License Verification

Make the process effortless by automating the driver's age driver's license validity and ID/passport verification before driving.

## Tripy Operation App

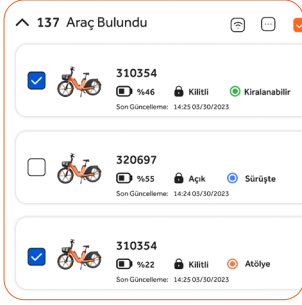

Automate the distribution and placement of tasks with the operations team app. The intelligent task distribution system creates a perfect rotation for each employee to find, charge, repair and place vehicles.

AI support determines exactly in which regions and how many vehicles you need to deploy to maximize your revenues.

## Some of the Key Features

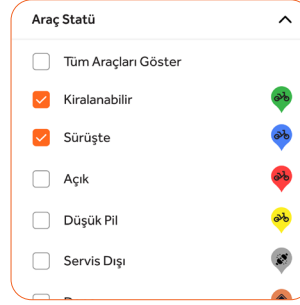

- Manage vehicles in the operation process
- Easy user interface
- Organize and update vehicles in bulk
- Add notes and tasks to tools
- Task distribution system
- Various map view options
- Rebalancing recommendations
- Manage repairs of defective vehicles

# Tripy Operation App

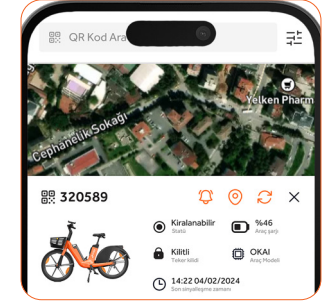

## Public Vehicle Editing and Updating

Select multiple tools in bulk with the operation app and apply specific actions to all of them at the same time.

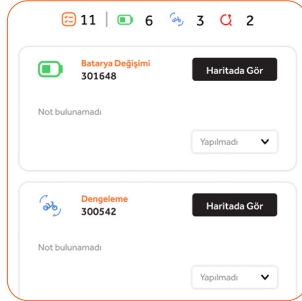

## Vehicle Filtering

Quickly filter vehicle types and take action on only the types you need. This feature speeds up your operation processes and increases your efficiency.

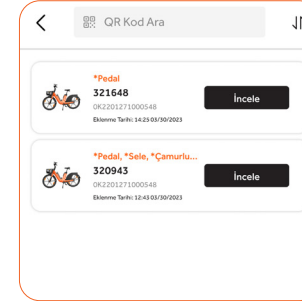

## Satellite Map Viewing Option

It can sometimes be difficult for the service team to locate vehicles. In this case, a satellite map view can be of great help.

## Track Vehicle Notes and Tasks

Add notes to your vehicles and manage tasks by category during the operation process with the easy-to-use operations app.

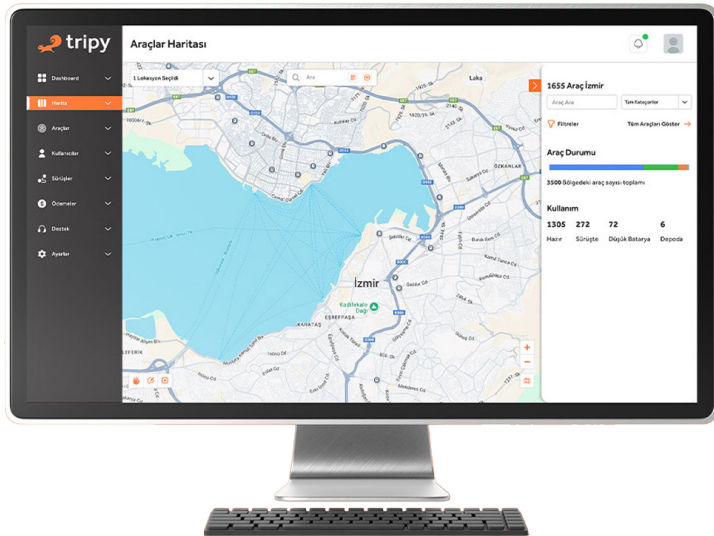

## Track the Repair of Your Vehicles

Add and track the maintenance and repair processes of your vehicles in the field by parts.

# Tripy Management Panel

Collect all data about every ride and every customer with an easy-to-use control system. Manage operations from one place, track results and make changes on the fly.

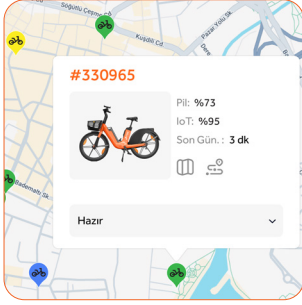

Don't worry if you have a large team, the system offers role management. So you can determine which information can be viewed and by whom.

## Some of the Key Features

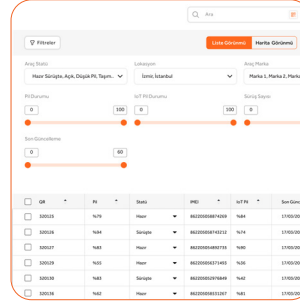

- Real-time fleet and driver data and location
- Fleet management - commands lock/unlock, states, notes, errors and warnings
- Statistics and heat map
- Multi-vehicle management
- Drive management and reports
- User management
- Subscriptions management
- Pricing management
- Regions and geographical delimitation
- Employee role management
- Call center and ticket management
- Instant mobile push notification management

# Tripy Management Panel

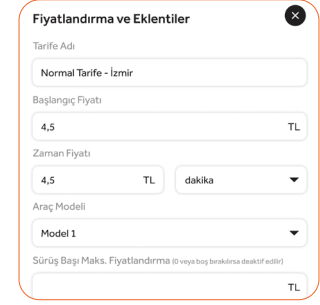

## Real-time Fleet, Driver Data and Location

Control your vehicle and driver remotely. Provide secure and efficient management with GPS tracking, locking, vehicle monitoring, sending commands, alerts and other features.

## Fleet Management

Make bulk changes and updates to selected vehicles, report damages, track faults, add tasks, make notes and send IoT commands. Manage your fleet quickly and efficiently.

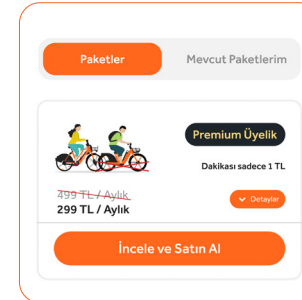

## Price Management

Set pricing according to your preference. Offer flexible options with minute-based, flat rate, stop price, dynamic pricing and other parameters.

## Dynamic Pricing

Our dynamic pricing feature increases or decreases fares depending on the time of day. For example, fares may be set higher on special occasions or in the afternoon on weekends.

## Subscriptions

Offer one-time or regular subscriptions to increase user loyalty. For example, provide a monthly subscription with 3 locks and 20 minutes of travel each day, or discounted options from the annual minute rate.

## Corporate Accounts

With corporate accounts, businesses can invite their employees, set monthly trip limits and cover all trips with a single monthly invoice.

## Regions and Geofencing

Our mapping helps you optimize your operations by supporting parking zones, no parking zones, discounted parking, no-entry zones and speed limits. These zones can be customized to your desired size and shape.

## Support Ticket

Create support tickets for payment issues, returns, damage, parking issues, upgrades, suggestions and campaigns to improve your users' driving experience.

Forward these tickets to the relevant people and offer quick solutions.
